BlasCom IT
IT & TELECOM STRATEGY

IT & Telecom Turnkey Solutions
to improve
Urgent Humanitarian Aid

Thanks to our expertise in technologies and humanitarian processes

Summary

BlasCom IT

1. IT & Telecom solutions importance

Aids humanitarian specialists became aware, in the same way as the medical or food aid, the real need in telecommunication and IT* solutions.

Conflicts pulled massive populations travels, separated thousands of families and no structure had been planned to allow these people to retie the contact with their close relations.

These IT* and Telecom solutions allow to improve effectiveness of emergency response.
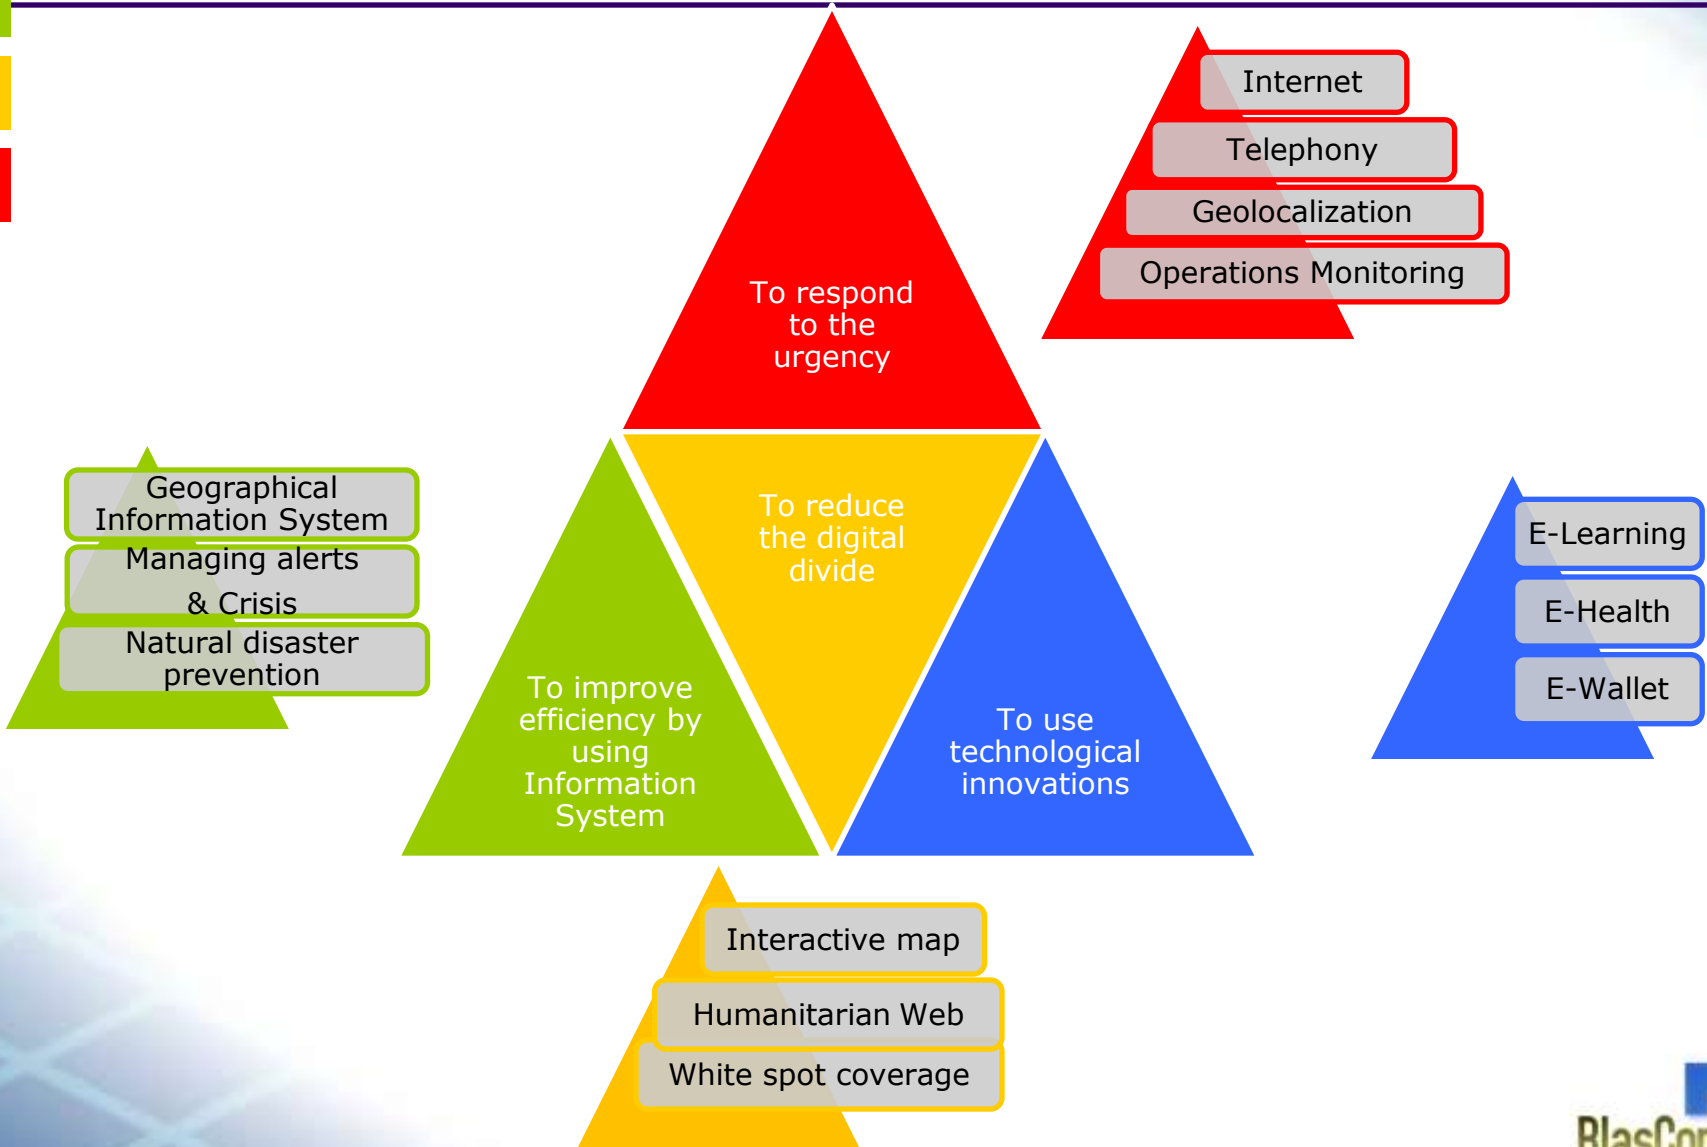

| Assistance to people in distress | Effectiveness Improvement of humanitarian actions |

Available information before and after disasters is more and more digital and produced by users. Mobile technologies are used to send preventive alerts, and allows the populations affected to produce and to spread local real time information.
