IT & TELECOM STRATEGY

Electronic & Telecom Systems for drilling machine

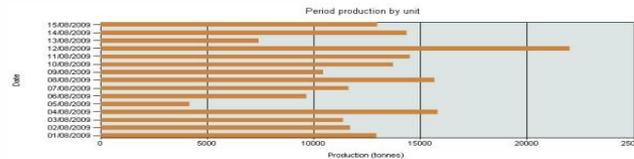

Drilling Optimization Technology

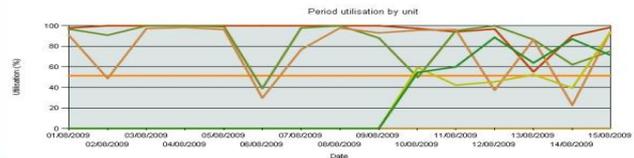

*Thanks to our expertise
in technologies and
mining industry processes*

Fleet monitoring system

Production data processing

Summary

1. **Technology 4 Drilling Principle**
2. **Product details and architecture**
3. **Computer assisted drilling benefits**
4. **Underground connectivity**
5. **Real-Time Data centralization advantages**
6. **Value added examples (3p)**
7. **Conclusion**

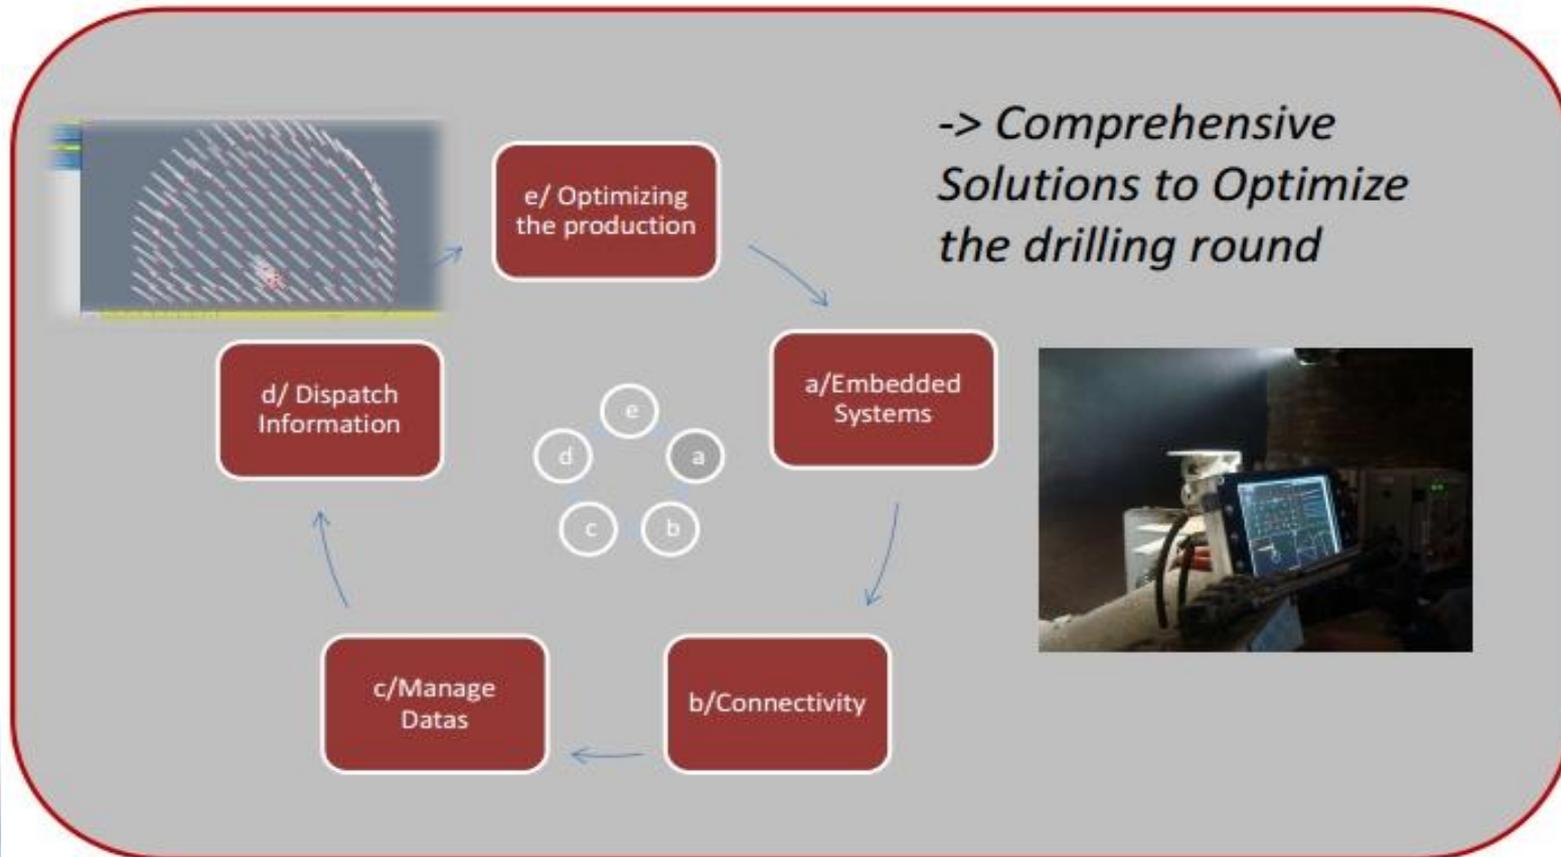

8. **Contact**

1. Technology 4 Drilling Principle

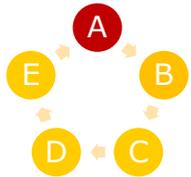

Our mission:

Develop solutions to optimize the operations costs of subterranean drillings.

Thanks to our innovative systems, you will be able to improve the quality, by getting real-time a complete reporting and to monitor closely all operations.

2. Product details and architecture

a) Electronics for drilling machines (OEM & Rebuilt)

Our solution can be adapted on many drilling equipments (Sandvik, Atlas Copco, ...)

IP67 Computer
5mm enclosure

Backbone
Equipment

Inovative Components :
HeavyDuty Context.

Easy to Use
Easy to Maintain

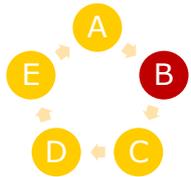

Modular IO Module (CAN Bus) With Specific Hardware

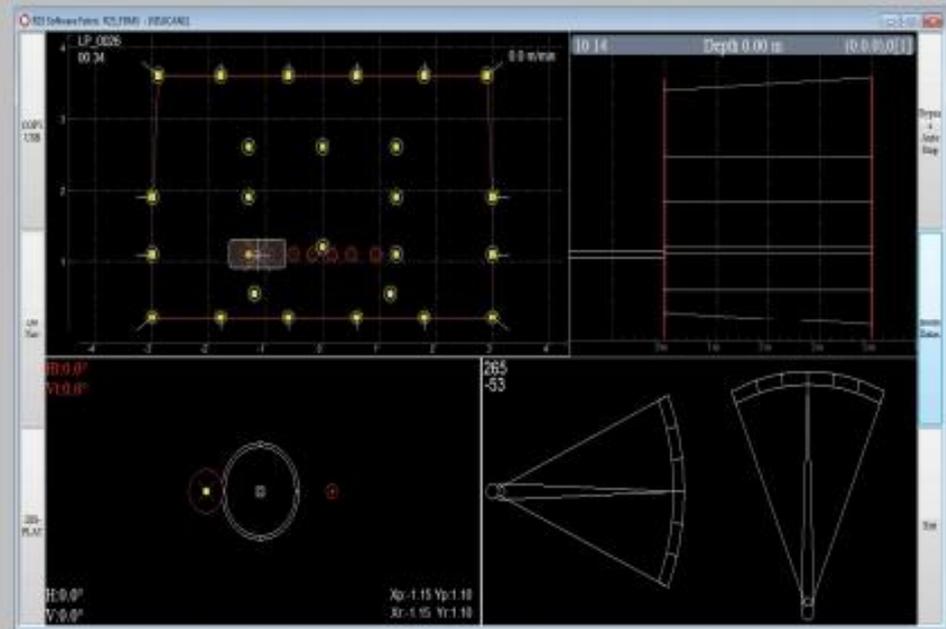

Contactless
angular sensor
(ATEX
available)

3. Benefits

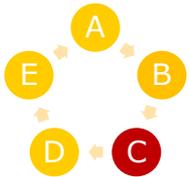

b) Computer Assisted Drilling

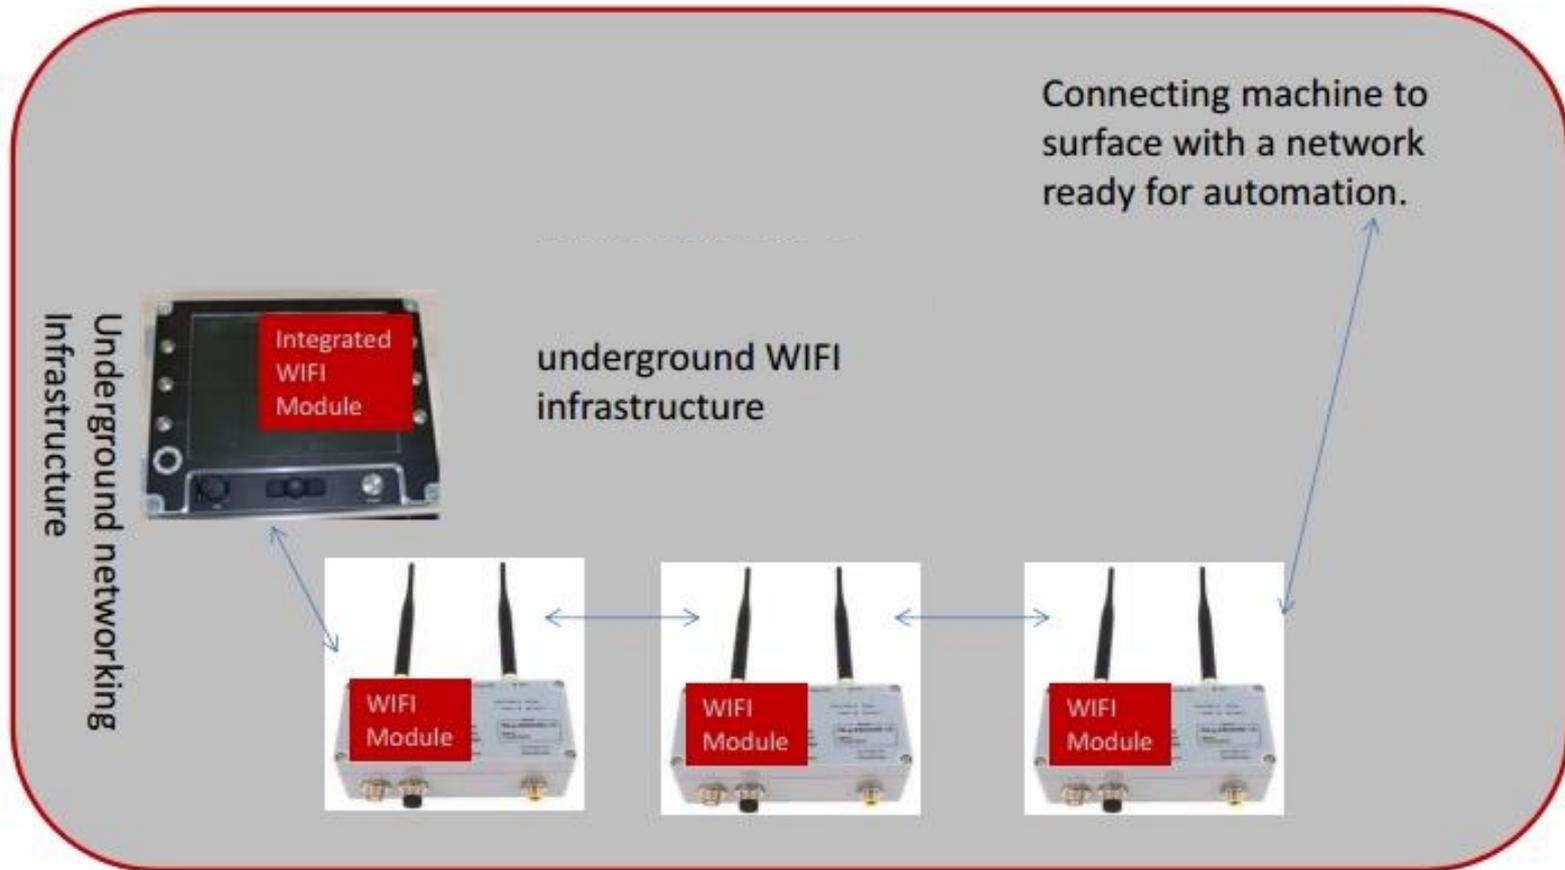

- Graphics assistance for the underground worker
- Monitoring, Remote Operation & semi automatic

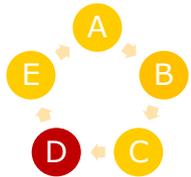

4. connectivity

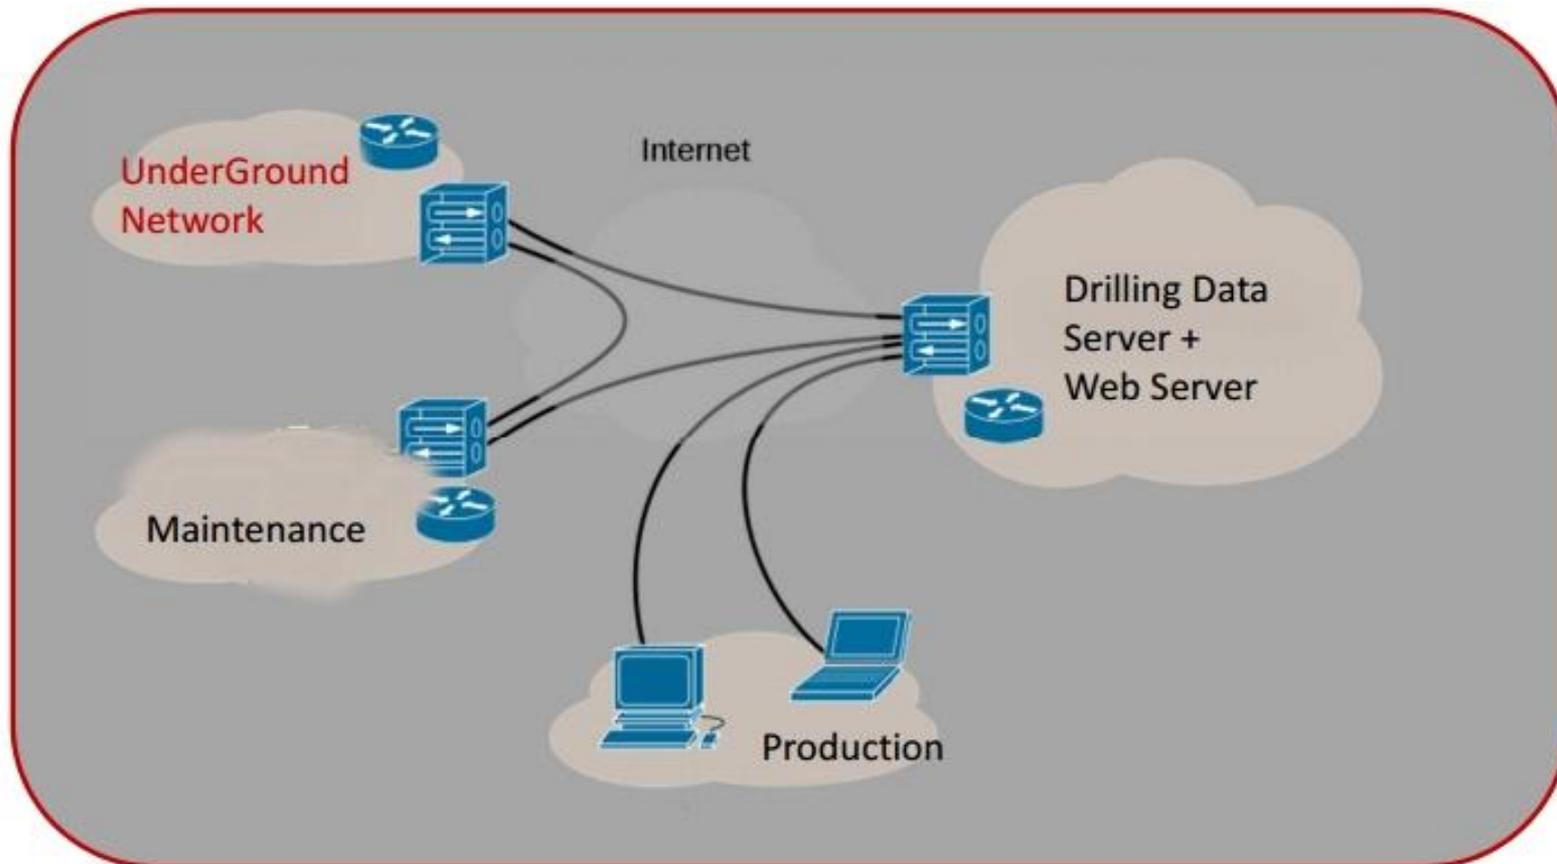

c) Underground Connectivity

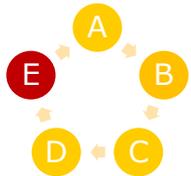

5. Real-Time Data centralization advantages

d) Automation in Processing and Dispatching Data (SAAS)

6. Value added examples

e) The right data to the right people on time

Ex 2 Production Check : Drill Round Report :

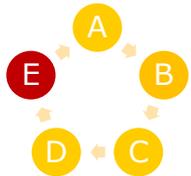

Drill Count	File	Date	Status	Supports	Angle	Angle	Reset	Delete
...
...
...
...
...
...
...
...
...

Check End of Drill

Check Position

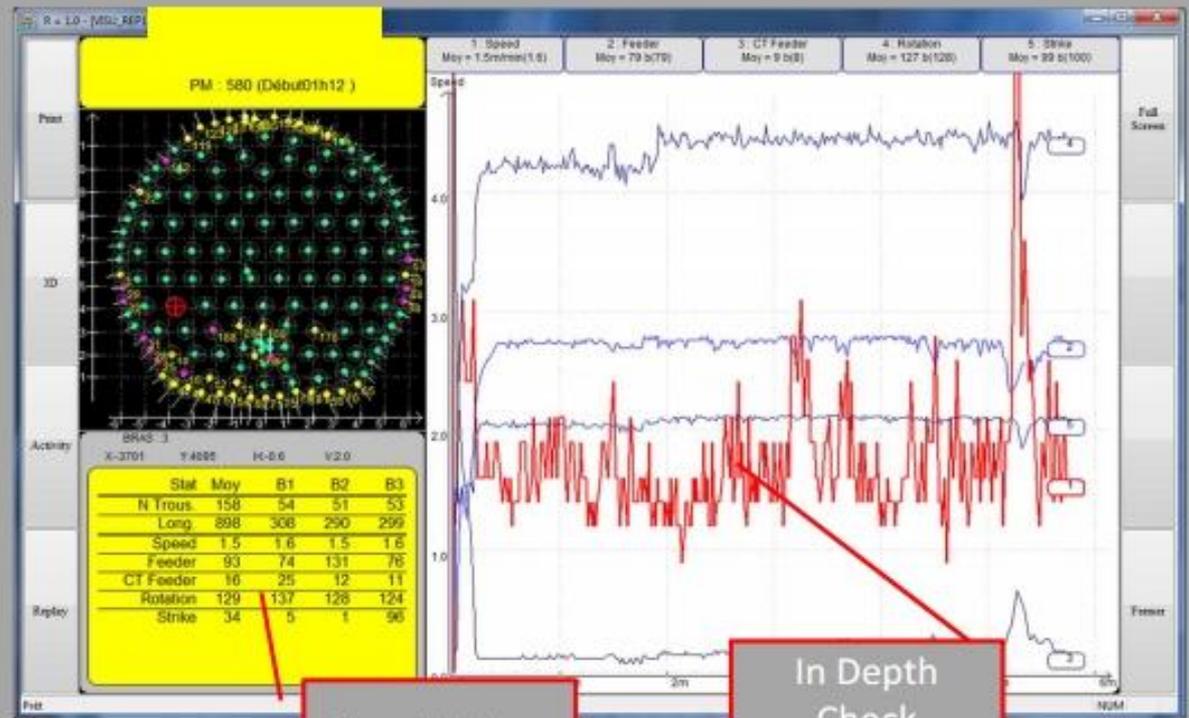

Check Schedule

6. Value added examples

e) The right data to the right people on time

Ex 2
Maintenance
Check :
Drilling
Parameters

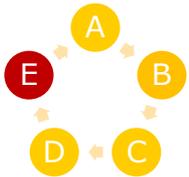

Check Values

In Depth
Check

6. Value added examples

3/3

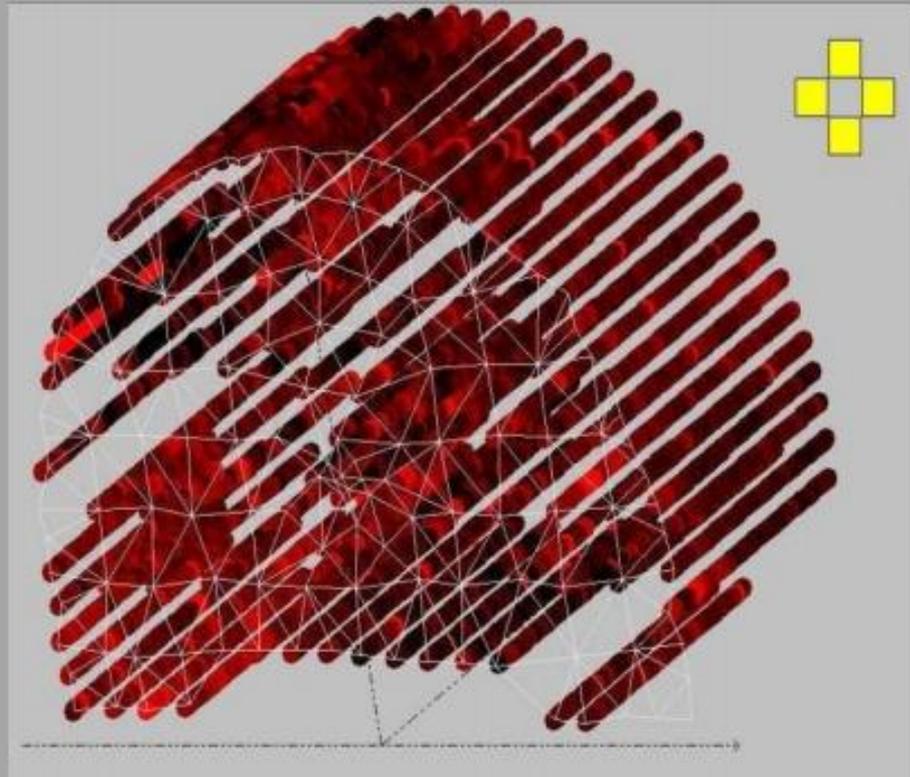

e) The right data to the right people on time

Ex 3

Geology Check :

3d view of the
penetration rate

7. Conclusion

- • Optimization of the drilling process in mining
- • Technology already deployed in Canada, Poland and Estonia
- • Prepare solutions for the mining demand
- • Can be coupled with equipments geolocalisation system
- • Dynamic R&D Environment in France at Lyon

Face Drilling Monitoring System : FDMS

A solution to help the minor to drill on the right position and correct the face with auto-retract capacity.

FDMS provides also a basic reporting system as a standard to display reports on the production manager desktop.

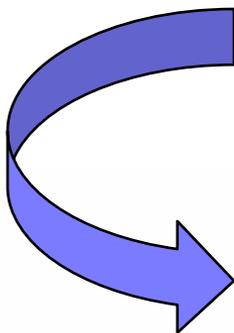

Semi automatic, extended reporting and more are under development to be available for production in 2014.

BlasCom IT embedded products are based on specific hardware and selected components to provide mining compliant solutions.
